

COVID-19 - MELBOURNE STAGE 4 RESTRICTIONS

As you probably are aware, from 6pm on August 2, 2020 the Metropolitan Melbourne area is under Stage 4 restrictions. The further restrictions were implemented by the Victorian Government to reduce the number of people leaving their homes and moving around the Metropolitan area, with a view that such a strategy will reduce the spread of COVID-19.

The Victorian Government has announced, as part of Stage 4 restrictions, that many businesses will be required to close for a 6 weeks period effective from midnight, Wednesday August 5, 2020. Only certain "Permitted Work Premises" businesses will be allowed to remain open, accordingly to a specific guideline published by the Victorian Government.

We would like to inform that all Victorian operations for **HUNT BOILERS** will remain **OPEN** and that normal communication with our team and our full range of products and services will continue. We can continue to operate on-site based on the following from the specific guidelines published by the Victorian Government:

- Hunt Boilers are an ancillary and support business required in the production, supply, manufacture, repair, maintenance, and distribution of goods or services necessary for the operations of permitted work sites or for closed work sites where there are safety or environmental obligations; and
- Hunt Boilers provides such supply, related to the health care industry including to all public and private health services.

Thanks in advance for your continuous support in these challenging times.

HUNT BOILERS REMAIN FULLY OPERATIONAL

While Hunt Boilers will still maintain its full range of COVID SAFE strategies, we will remain open for all required attendance at customer's facilities and will provide any safety, service and breakdown requirements

HUNT BOILERS BOOSTED STOCK HOLDINGS

Boilers and boiler spare parts inventory has been increased throughout Australia. Hunt Boilers has more than 25 new boilers available in capacities from 100 kW to 8 MW, and spare parts for more than 6 months' general supply

HUNT BOILERS CRITICAL SPARE PARTS STRATEGY

We recommend for all customers that consider their boilers essential to operations, that a critical spare parts inventory is ordered and held at site. This strategy may have significant impact on keeping boilers operational

STRATEGY TO SHUT-DOWN BOILER SYSTEMS

In order to protect your boilers during any extended lay-down period, Hunt Boilers recommend that proper wet storage procedures are followed, including correct isolation of equipment. This will ensure the best possible outcomes when boilers are returned into service
